- Every part of the site hear alerts, including outside areas
- Ability to create zones with different schedules & alerts

About Bodet Limited

Bodet has provided Synchronised Clocks, Bell Systems and Time and Attendance solutions for over 25 years.

This devotion to constant improvement has enabled Bodet to become the European leader in its sector.

Commercial Director, Marc Aaron Cotton, explains how Bodet's Clocks and Sounders flexibility and unique audio system have transformed the running of the manufacturing company:

What was the challenge you were looking to overcome initially?

Leisure Furniture Company manufactures soft furnishings, curtains and headboards. Due to different parts of the business being located in different production areas, "We wanted a way of alerting people when their break times and clean up times were done and so everyone was doing it in uniformed way." Said Marc.

What system was installed?

By combining the Harmonys Wall sounders and microphone with Harmonys Trio, Leisure Furniture Company can communicate with bells, microphone announcements, luminous strobes and time display. Supplied with 18 pre-programmed sounds and with the ability to expand up to 30, it provided LFC the personalised experience that they were looking for. "It is a combination that worked for us and is a very flexible system. It is customisable and can do a range of different timings across different zones", Marc added. Using an IP network structure and customisable audio system, Leisure Furniture Company are able to harmoniously synchronise all of the Wall Sounders so they can communicate effectively to all two hundred employees.

What are the benefits of the equipment for your organisation?

The clocks and sounders have proven to maximise productivity and improve the running of the business. Marc summarised, "We now get more production time. People know when it is time to go rather than finishing earlier. Everything is done in a more controlled manner and everybody works a full day. It is a very good system."
